

## ACROSS

- 1 (Bruce) As Flamethrowers evolved, methods such as the 'blowtorch and corkscrew' utilized liquid flame as the blowtorch and \_\_\_ as the corkscrew
- 3 FNS-C models are geared toward the concealed carry market; FNS and FNS \_\_\_ were geared toward the full sized and competition handgun markets
- 5 ( Bartocci) The YHM Model 57 carbine upper and lower receiver is manufactured from a \_\_\_ instead of a forging
- 6 Billet Aluminum Modern Firearm (abbr)
- 7 (Burgreen) Two differences between the SPHINX SDP Compact and the original CZ 75 are that "cocked and \_\_\_" carry is not possible and the lockup
- 8 Alcohol, Tobacco & Firearms (abbr)
- 10 (Kontis) Bob Chiabrandy designed one of the fastest firing guns in the world, reaching 12,000 rpm; named the \_\_\_ C
- 15 All Glock pistols fire from what Glock refers to as "\_\_\_ Action." The first part of the \_\_\_ Action is the passive trigger safety
- 16 (Bartocci) The Glock pistol chambered in .380 Auto caliber did not accrue enough \_\_\_ to be considered importable into the United States due to the caliber, a component of the point scale
- 17 (Murphy) The ZVI Falcon is a \_\_\_ bolt action anti-materiel rifle firing either the .50 BMG (OP96), or the 12.7x108mm Russian machine gun round (OP99)
- 18 (Choat) The FNS models are different from FNX pistols in that they are double action only and are \_\_\_ fired instead of hammer fired

## DOWN

- 1 Everyday Carry (abbr)
- 2 (Segel) The Japanese Taisho Type 11 (Model 1922) Light Machine Gun oil reservoir had to be located immediately over the center of the feedway; this caused the \_\_\_ to be offset to the right
- 4 The MAX-31 Mk2 upper receiver, designed for the M11/Nine submachine gun is specifically designed to allow the use of the 71-round Suomi M31 \_\_\_ magazine
- 5 (Myrvang) September 1942, a batch of 110 silenced Stens were delivered to the SOE, these silenced weapons had \_\_\_ bolts instead of steel
- 9 (Ficaretta & Reeves) One of the regulatory definition of "curios or relics," is that the C&R be at least \_\_\_ years old
- 10 (Choat) The CPX-1 and the CPX-2 are both chambered in 9mm and are identical except that the CPX-1 has a \_\_\_ safety lever
- 11 (Iannamico) The 9mm M11/Nine submachine gun was patterned after the basic Model 10 \_\_\_ design and was one of the first submachine guns manufactured specifically for the civilian market
- 12 (Lake) The BAMF "DD" (double "d") has an ambidextrous forward assist and simultaneous bolt release integrated and incorporated into the \_\_\_ receiver
- 13 (Martens) The German SS Grenade ZK 424 has no sights or sight base, no lanyard rings and no \_\_\_
- 14 (Pazdera) the Vz.54 Sniper Rifle based on the ZG 51 Sn prototypes used a Mosin vz. 91/30 action instead of the M98 \_\_\_-type action
